From a 30-second reel to a paid assessment

A multi-city, in-person seminar funnel for the Philippine market, run three times in 2026 with no paid media. I designed the system, built the pages, forms, automation and reporting, and presented on stage.

STAGE 1 — Attract

Reach the right person, free

Organic short-form

30 to 45 second reels, written date-free so they stay evergreen. One generic call to action.

Facebook · TikTok · Instagram

→

Landing page

VSL 1 (6 to 7 min), countdown to the next session, one grid holding every room.

Hand-coded · Vercel · YouTube

→

Registration

One form per session, so demand, capacity and attendance can be read room by room.

Tally ×7

STAGE 2 — Confirm

Turn a sign-up into a seat

Shared confirmation page

Forms redirect with a session code only, no personal data in the URL. A lookup fills date, venue, map and calendar files. VSL 2 pre-sells the paid next step.

HTML / JS · Vercel

→

Confirmation and reminders

Same URL in every email. YES / NO buttons move each contact to a Confirmed or Cancelled list, filtered per event by an event-code field.

Brevo

→

QR check-in

Attendance captured at the door so registrations and attendance reconcile per session.

Tally · QR

STAGE 3 — Convert

A paid step that filters for intent

Seminar

Opens with why people move to New Zealand and my family's story, then works backwards from citizenship to the visa that leads there.

→

In-room offer

Scan, pay for the Strategic Visa Assessment, upload proof, land on a booking calendar. Reserved slots shown live.

GCash · Stripe · cal.com

→

Paid assessment

Adviser consult plus a written report. The fee is credited to the next service booked.

Teams · Report template

SEPT/OCT 2026 RESULTS

2,796 registrations

7 in-person sessions

6,667 on the waitlist

$0 media spend

80% of registrants came via the practice's Facebook page.

UNIQUE REGISTRATIONS, RUN OVER RUN

No paid media in any run.
